AWS Data Design Lab

Accelerate your path to modern data in just one week.

To use data in different ways, you first need to process and store data in a new way. For startup customers with large volumes of data, this can be daunting, especially considering what's involved — moving to a new or modernized data environment and considering custom machine learning needs, analytics demands and real-time data streaming.

With the AWS Data Design Lab, Onica by Rackspace Technology can help create tangible deliverables that accelerate data, analytics, artificial intelligence (AI), machine learning, serverless and other modernization initiatives.

You'll gain a faster path to production and deeper knowledge of Amazon Web Services data and analytics services, including:

- Database modernization
- Extract Transform and Load (ETL) migration and modernization for batch and streaming
- Data platform for ad-hoc querying, visualizations and advanced analytics
- Data lake modernization for managing and processing data more effectively
- Graph analytics
- Machine learning

Key Benefits

When you deploy the AWS Data Design Lab, you can expect to gain these benefits:

A well-defined implementation strategy

Access to Onica® data subject-matter experts who will provide architectural guidance before you start building

Accelerated progress for creating tangible deliverables

Funding by AWS (if qualifications are met) via the AWS Data Acceleration Partner Program (DAPP)

About Onica by Rackspace Technology™

- 2,500+ AWS accreditations
- 13 AWS Service Delivery Designations
- AWS 2021 Migration Partner of the Year (U.S. and Canada)

Expertise Across 15 AWS Competencies

- Data & Analytics
- DevOps
- Education
- Financial Services
- Healthcare
- Industrial Software
- IoT
- Machine Learning
- Microsoft Workloads
- Migration
- Oracle
- Retail
- SaaS
- Storage
- Travel & Hospitality

Project Details

Duration	Description		Fee
1 week	Discovery	Design	$10K
	· Use case selection · Current system review · Define goals	Create future-state architecture	$10K AWS funding **Total: $0**

Deliverables

- Future-state architecture diagrams
- Future-state documentation
- High-level future-state backlog activities
- Proposal for follow-up implementation engagement

Take the Next Step Toward Data Modernization

Let's talk about how Rackspace Technology expertise helps you achieve your goals.
