Rackspace Elastic Engineering for AWS delivered by Onica

On-demand access to a team of highly skilled AWS experts who collaboratively drive your cloud outcomes while continuously evolving your environment.

It's no longer enough to just "be in the cloud." Today businesses are under pressure to use cloud technologies to solve strategic problems, build new revenue streams, and decrease costs. With the pace of innovation accelerating like never before, they need to transform how they operate in the cloud — to evolve to cloud native.

As organizations pursue this evolution, they need more than just support. They need help understanding how to scale their IT organization in an agile world, how to transform their environments, how to streamline their operating models. As IT organizations break down the traditional build and operate barriers and open up new possibilities to accelerate innovation, they need more than the traditional MSP models constrained to fit inside the boundaries of the past.

A Modern, Highly Collaborative Support Model Built for the New World

Rackspace Elastic Engineering delivered by Onica® provides your business with access to a pod of Amazon Web Services (AWS) certified cloud engineers who work as an extension of your team to shape your outcomes as you evolve to cloud native.

There are no tickets, and no SLAs to monitor — you simply work with your pod of multi-disciplinary and highly skilled AWS experts as you would your own team. You'll always work with the same dedicated pod and resources, accessed in flexible and easy to manage hours-based tiers each month. Work collaboratively to set sprint-based projects and long-term goals that move your cloud environments and results forward. Rackspace Elastic Engineering delivered by Onica supports a broad range of cloud services including building, migrating, optimizing and managing your cloud environments on AWS.

Nine AWS Specialists — an Extension of Your Team

A dedicated team of multi-disciplinary cloud experts supporting a broad range of outcomes.

Engagement Manager + Lead Cloud Architect + Cloud Architect + Senior Cloud Engineers + Cloud Engineers

Migrations, Architecture, Automation, Optimization, Reliability and Security.

The benefits of your pod include:

- **A do-with approach:** Pods work in an agile, sprint-based model right alongside your team.
- **Consistency:** No matter which tier of hours you use each month, you'll always work with the same pod that knows you, your environment and your business.
- **Flexible, tiered pricing:** Purchase fractional access to your pod via straightforward hours-based tiers and scale up and down monthly as your business needs change.
- **Multi-faceted skill sets:** Your pod for Data consists of an engagement manager, architects and engineers working together as one unit.
- **Ongoing innovation:** You can more easily leverage leading cloud tools and frameworks to facilitate progressive improvement, enablement and transformation.

Take yours next step toward cloud native today.
