

# Rackspace Elastic Engineering for VMware

On-demand engineering and support to help you unlock innovation and new capabilities across VMware multicloud environments.

Planning your cloud strategy? Need to optimize costs without sacrificing functionality or adoption speed? Leverage an assigned team of VMware® experts that works with your organization to help optimize workloads, take advantage of powerful VMware attributes, including cloud native capabilities, and accelerate innovation across your VMware environment.

Wherever you are on your VMware journey, Rackspace Elastic Engineering for VMware is designed to provide expertise when you need it most.

Rackspace Elastic Engineering for VMware provides on-demand cloud engineering and support that helps you realize the true potential of everything VMware multicloud environments can deliver so you can:

- Break free of the constraints of traditional cloud consumption models and streamline your cloud spend to achieve economies of scale.
- Drive transformation that supports both traditional and cloud native workloads.
- Migrate and optimize workloads faster — one or many workloads at a time.
- Successfully deliver on cloud projects while staying ahead of cloud technology's evolution and demands.

## Agile Support and Engineering Model

Rackspace Elastic Engineering for VMware will enable you to scale your IT organization in an agile world, transform your VMware multicloud environments, and streamline your operating models. With Rackspace Elastic Engineering for VMware, the same team of cloud experts is assigned to work with your team to optimize your VMware workload migrations and accelerate innovation in the cloud.

There are no support tickets to submit and no SLAs to check. Rackspace Elastic Engineering for VMware allows you to simply work directly with your assigned team of multi-disciplinary and highly skilled experts as you would your own team. You can work collaboratively to set sprint-based projects and long-term goals that move your application environments and results forward.

- **Support traditional and modern apps:** Industry-recognized VMware expertise to plan, design, manage and optimize your VMware environment anywhere.
- **Increased control over operational costs:** Manage costs in a way traditional subscriptions/support models don't allow. Pull from a flexible pool of hours for simultaneous use across one or many VMware workloads, so you can scale up or down as your organization's needs change.
- **On-demand access to experts:** Engage an on-demand team of certified professionals with expertise in all aspects of VMware and data center management, including hardware.
- **Consistent team structure:** The same team of experts familiar with your goals and mission typically works with your team for extended periods of time.
- **Tap into shared knowledge and resources:** Rackspace Technology creates and shares resources, platform tools and frameworks across all our cloud expert teams to deliver the best possible know-how to customers.

## About Rackspace Technology®

Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

- 2,600+ cloud experts
- Hosting provider for more than half of the Fortune 100
- Servicing more than half of the U.S. Federal Government agencies
- 20+ years of hosting experience
- Customers in 120+ countries
- VMware Principal Partner
- 400+ VMware certifications
- 15+ years managing VMware environments
- One of VMware's largest service providers with VMware-validated full SDDC architectures
- Dell Technologies Titanium Partner
- AWS 500 Certified Partner Network
- Azure® Expert MSP
- Google Cloud Partner

## Industry Recognized Leader

- Three-time recipient of VMware Partner Innovation Award
- Five-time recipient of Dell Technologies Partner of the Year Award
- Google Cloud Partner of the Year
- A leader in the Forrester Wave: Hosted Private Cloud Services, Q2 2020, North America and Europe
- Leader in the 2020 Forrester Wave™ report for managed multicloud services
- A Major Player in the IDC MarketScape: Worldwide Colocation and Interconnection Services 2019-2020 Vendor Assessment
- A leader in the 2020 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide

- **Build a Super Team of On-Demand VMware Expertise:** The VMware experts assigned to work with your team include architects, engineers and technical account managers — all working together as one unit.

## Deep VMware Expertise Where and When You Need It

Rackspace Elastic Engineering for VMware supports a broad range of VMware technologies to help you build, migrate, optimize and manage your VMware environments on-premises, across hyperscalers and in third-party data centers. You'll receive the expertise you need across your VMware environment wherever you need it. Accelerate and strengthen critical components of your VMware environment including, but not limited to:

### Cloud Migrations

Elevate your workloads in the cloud

- HCX
- VMware Site Recovery
- vSphere vMotion
- Zerto Virtual Replication

### Reliability

Build on high availability platforms

- Dedicated and shared
- VMware Cloud on AWS
- Azure VMware Solutions
- Google VMware Cloud Engine

### DevOps and Automation

CI/CD pipelines and automated deployments

- vRealize Automation
- vRealize Orchestrator

### Optimization

Optimized VMware environments

- Tanzu
- vRealize Operations
- vRealize Network Insight

### Architecture Build-Outs

Build a solid VMware cloud foundation

- Software Defined Data Center (SDDC)
- Tanzu
- ESX, NSX, vSAN

### Security

Maintain secure environments and deploy third-party tools

- Carbon Black
- NSX
- Service Defined Firewalls
- SASE
- SD-WAN

## Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

## Take the Next Step

Let's talk about how Rackspace Elastic Engineering for VMware helps you achieve your goals.
