

# Rackspace Application Services for Oracle Business Intelligence

Get more insight from your data.

How confident are you that your business is extracting maximum value from the data it generates? If you aren't fully utilizing the data generated within your organization, you could be missing out on opportunities to apply this business intelligence (BI) to improve your business processes and reduce your operating costs.

Rackspace can help you use Oracle® BI and analytics platform to gain valuable insights from your data — and turn these insights into actions by initiating and integrating business processes within your organization.

## Experts Dedicated to Your Success

As an Oracle Gold Partner, Rackspace has over 10 years of experience implementing, managing and supporting customer solutions based on the Oracle Business Intelligence Enterprise Edition (OBIEE) application stack such as:

- Assessments and roadmaps
- Data warehouse and integration
- Dashboards, analysis and reporting

Rackspace can also manage the Oracle Hyperion Enterprise Performance Management (EPM) suite of BI applications for you, including financial planning, budgeting, forecasting, consolidation, reporting and analysis.

## Key Features and Benefits

**Managed Infrastructure:** Enjoy flexible hosting options for your Oracle BI solutions and choose the solution that meets your business requirements for a scalable infrastructure:

- Fully managed dedicated servers (in a Rackspace data center)
- Single-tenant private cloud (in your own data center, or a service provider's)
- Dedicated server connected to a private or public cloud (hybrid cloud)

Rackspace managed hosting services include servers, operating systems, storage, backups, networking and security.

**Managed Applications:** Rackspace expertise extends beyond infrastructure to the Oracle applications your business uses every day. Leverage industry-leading expertise to manage — and provide on-going support for — your Oracle BI applications.

Rackspace supports you by:

- Offering best-practice guidance
- Implementing and supporting features and functionality
- Answering questions, troubleshooting and resolving issues

Managed application services for Oracle include functional support for business processes, customization, consulting and database administration.

## About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2019 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide

*"Planning, risk analysis, coordination and execution of the project was flawless with no issues."*

**Arun Kumar :: Oracle Applications Lead, Jotun Powder Coatings**

## Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

**Customized Solutions:** Certified experts are always available to help you customize your Oracle BI solution and work with you to:

- Assess ways to architect and optimize your solution
- Define key metrics and analytics to measure and report on
- Create a strategic roadmap for implementation

**New Implementations:** The Oracle-certified experts at Rackspace can help you with everything from BI solution design to metric tuning and analysis.

Rackspace will streamline the analytics process so you can discover efficiencies within your business and find meaningful patterns in your data.

**Patches and Upgrades:** Offload development tasks related to applying fixes and performing upgrades for your Oracle BI solution. Rackspace will help ensure optimized performance while enabling your IT team to focus on higher-value activities and more strategic initiatives.

### Take the Next Step

Let's talk about how Rackspace can help you implement and manage Oracle ERP applications.
